

# Attracting Butterflies and Hummingbirds

What You'll Need:	
Essential Items	Desirable Items
Plants They Enjoy	Soil Activator
Soil Enhancer	T&C Fruit and Flower Food
Root Stimulator	Bird Bath

Butterflies and hummingbirds are welcome to most gardens. Choose the right plants and you can encourage them to stay a while. Sunny areas such as meadows that are sheltered from the wind and contain such amenities as leaf litter, rock crevices, brush piles, damp places, and even weeds are the most welcoming of gardens for butterflies. Never use pesticides, unless you can target the specific pest without harming the butterflies. Flowering plants provide nectar. Spiders and insects supply protein. Hummingbirds visit a huge array of plants. The plants listed below are some of their favorites.
