

Save-a-Tree

Organic Based Plant Food

What You'll Need:
Save-a-Tree
Bucket to mix it in
Water

**It's not just
for trees!**

This is the best organic based liquid plant food we've ever come across. Invented by a fellow Idahoan in Boise, we discovered it over 15 years ago and it quickly became our top selling plant food, because IT WORKS!

As the name implies it is especially useful for trees and other plants that are under stress from poor soil, weather damage, insect damage, and disease problems. But that is only half the story. We really wish it had a better name, because in addition to saving trees that are struggling, it is great for keeping healthy trees healthy. And more than that it is a fantastic all-purpose plant food for roses, flowers, shrubs, berries, and vegetables.

Nourish the Life in Your Soil

Save-a-Tree is made from cane molasses, rock phosphate, elemental sulfur, and ammonium hydroxide. It's nontoxic to kids and pets and it's loaded with trace minerals which makes it perfect for growing healthy, sturdy plants in our alkaline Idaho soils. The patented natural non-burning formula provides nutrients to the plant on an as-needed basis, providing the plant with complete nutrition without "forcing" growth.

Simply mix it with water according to the directions on the bottle and pour evenly on the soil around the plant. Apply monthly for flowers and vegetables, Twice per year (spring and fall) on trees and shrubs. May be applied at any time of year. Available in 1 gallon, 2 ½ gallon, and 5 gallon jugs.
