3	June 15	Espoma Summer Revitalizer	39.99
4	Oct. 15	Espoma Fall Winterizer	<u>39.99</u>
Regular Price			\$159.96
Savings with full program purchase			-20.00
Total Annual Cost			\$139.96

Step 1 – Espoma Organic Spring Lawn Booster - April 1 (March - April)

It supplies long lasting nitrogen, an essential nutrient that helps promote a thicker lawn with deeper green color and more vigorous growth. It is fortified with extra calcium, an important secondary plant nutrient, to help ensure superior results. Calcium helps strengthen your turf's physical structure, increase nutrient uptake and helps protect it from disease.
8% Nitrogen, 3% Calcium, 1% Sulfur

Step 2 – Espoma Organic All Season Lawn Food – May 15 (May - June)

Formulated from all natural nitrogen with added Bio-tone® a propriety blend of microbes that biologically enhances the fertilizer for superior results. The slow release nitrogen helps reduce the frequency for mowing while the microbes help make nutrients more available to your lawn.
8% Nitrogen, 1% Calcium, 1% Sulfur, 642 colony forming units per gram of microbes.

Step 3 – Espoma Organic Summer Revitalizer– June 15 (June - August)

Long lasting nitrogen with added natural non-staining iron to help ensure a healthy deep green color, and Bio-tone® blend of microbes. The non-burning formula will help revitalize your lawn without the need for frequent mowing. 8% Nitrogen, 1% Calcium, 1% Sulfur, 2% Iron, 624 colony forming units per gram of microbes.

Step 4 – Espoma Organic Fall Winterizer- Oct. 15 (October-November)

Late fall is probably the most important feeding of the year. Application can be made anytime in the fall, but the ideal time to apply is in October or November. Since your lawn is approaching dormancy now, nearly all of the nutrients are used to promote root growth and very little for top growth. *Fall Winterizer* supplies long lasting nitrogen but is also fortified with potassium, a nutrient that helps the lawn recover from summer drought conditions, enhances winter hardiness and helps promote a better spring greening the following season.

8% Nitrogen, 5% Potassium, 1% Calcium, 1% Sulfur

Additional Lawn Care Options **Broadleaf Weed Control**

Keeping your lawn healthy and well fed will greatly reduce weeds in your lawn. Therefore we do not include a weed control product in the program. If there is a need for organic weed control *Espoma Organic Weed Preventer* containing corn gluten meal can be used. Corn gluten meal naturally inhibits seed germination. Another organic control is good old elbow grease (manual removal of weeds).

Easy to Remember
Holiday Timing

- 1 - April Fools Day-** Espoma Spring Lawn Booster
- 2 - Memorial Day-** Espoma All Season Lawn Food
- 3 - Fathers Day-** Espoma Summer Revitalizer
- 4 - Halloween-** Espoma Fall Winterizer
